DESCRIPTION

The SC™-8a is an eight button MIDI System Control Interface that allows users to easily recall different system configurations stored in programmable products such as the CEX™ 4La and CEQ™ equalizers.

The SC-8a has two modes of operation. The eight buttons in the first mode each recall a different configuration. In the second mode, each button can control a separate piece of equipment, or system segment, and toggle it between two presets.

The SC-8a has screw terminal connections for remote switches and indicators, and a MIDI input for merging other MIDI data.
