

SPECIFICATIONS

Tour™ 410

Transport provisions:

Steel handles, one on each side

Dimensions (H x W x D):

27.75" x 24.38" x 19.13"
705 mm x 619 mm x 486 mm

Net weight:

65 lbs. (29.5 kg)

Frequency response, 1 meter on-axis, swept-sine in anechoic environment:

41 Hz to 15 kHz

Power handling:

1600 W program
3200 W peak

Sound pressure level, 1 watt, 1 meter in anechoic environment:

100 dB SPL (2.83V input)

Transducer complement:

Four high-performance neodymium magnet 10" woofer
One 1" horn loaded tweeter with level control

Box tuning frequency:

49 Hz

Crossover Frequency:

4000 Hz

Impedance (Z):

8 ohms

Input connections:

Two 1/4" phone jacks
One 4-pin Neutrik® Speakon® jack

Enclosure materials and finish:

Ultra-light, 18 mm plywood-finished in Black Tolex® and reinforced with steel corners. The drivers are protected by a steel grille with classic Peavey "Silver Stripe" trim on each side.

Features:

- All-plywood construction
- Durable black Tolex covering with steel corners
- Classic Peavey "Silver Stripe" grille trim
- Four 10" neodymium magnet high-performance woofers
- 1" horn-loaded compression driver tweeter
- Tweeter has overload protection circuit
- 1600 watts program power handling
- Front vent for bass punch and impact
- One Neutrik® and two 1/4" phone jacks in parallel
- Light-weight enclosure with Neo woofer, 65 lbs.

Description:

Peavey designed the new Tour Series from the ground up to reduce weight, with the gigging musician in mind. The combination of the ultra-lightweight plywood and the neodymium-loaded woofer delivers a cabinet so light that you have to pick it up to believe it. Despite the reduced weight, the Tour 410 does not compromise power handling or tone. The Tour 410 is voiced to match the Peavey Tour 700 and Tour 450 bass amp heads, but can be used with other fine bass amp heads as well.

The Tour 410 is constructed using a special grade of ultra-lightweight 18 mm plywood and is covered with durable black Tolex. The cabinet incorporates steel-reinforced corners for excellent road worthiness. The perforated, black steel grille is trimmed with the classic Peavey "Silver Stripe" motif on each side for an elegant retro look.

The four 10" neodymium magnet woofers provide a large portion of the weight reduction while maintaining exceptional power handling and stellar bass tone. Coupled with a 1" diaphragm compression driver horn-loaded tweeter with an adjustable level control, the system provides full-range bass guitar performance. The level control allows the high frequencies to be tailored to complement any style of playing. A self-resetting protection circuit is incorporated into the tweeter crossover to help prevent damage to the horn tweeter due to long-term overload power exposure. Once triggered, it will cut signal to the tweeter, and once the overload is removed, it will reset, allowing the tweeter to once again produce output.

The cabinet vent is located on the front near the bottom and is free of any grille air-flow restrictions, allowing maximum bass punch and impact.

With a nominal impedance of 8 ohms and a power handling of 1600 watts program and 3200 watts peak, the Tour 410 can be used in conjunction with a number of other bass guitar enclosures from Peavey, including the Tour 210 or the Tour 115. Be sure to check the amplifier specifications to verify the minimum impedance rating of the amp used to power multiple cabinets.

3 + 2 YEAR LIMITED WARRANTY
