

PV® 23XO

OVERVIEW

The PV 23XO is a two dualchannel crossover incorporating Peavey's legendary low-noise, low-distortion design. Ruggedly constructed, PV 23XO gives the operator the flexibility to establish a two-way stereo system or run in a three-way mono configuration. The PV 23XO has variablestate filter controls with 24 dB per octave filters and utilizes XLR inputs and outputs for balanced operation from 20 Hz to 20 kHz.

FEATURES

- 24 dB filters and mute switches
- Fully-adjustable crossover frequencies and levels
